## New course: *Is Aspirin the New Pregnancy Miracle Drug?*

LAMMICO offers 0.5 continuing medical education (CME)/continuing nursing education (CNE) credit for physicians, women's health nurse practitioners and obstetric nurses who partake in this free course.

More than 33% of serious maternal deaths and 15% of preterm births are related to pre-eclampsia. Low-dose aspirin prophylaxis can reduce the incidence of pre-eclampsia by 17% to 25% for women at high or moderate risk for pre-eclampsia. In July 2018, the American College of Obstetricians and Gynecologists and Society for Maternal and Fetal Medicine issued *Joint Committee Opinion #743* with new recommendations for the use of low-dose aspirin prophylaxis to prevent and treat pre-eclampsia.

This course will improve perinatal providers' understanding and application of the new guidelines into clinical practice.

Go directly to this course at <https://medicalinteractive.net/courses/50578> or go to <https://medicalinteractive.net/catalog> and select **Topics: Perinatal** for the course.

### Note:

- LAMMICO policyholders will receive 0.5 credits toward a Risk Management Premium Discount that may reduce the basic limits portion of your LAMMICO insurance premium by 10% every year.
- Providers (including those who are not LAMMICO policyholders) must register and place in their *cart* **as if** purchasing. Remember, this course is free.

If you have questions, call **1-504-836-8888**.
