

Project ECHO Opioid Use Disorder Provider Telementoring Series

What is Project ECHO?

Project ECHO's (Extension for Community Healthcare Outcomes) mission is to develop the capacity to demonopolize knowledge and amplify the capacity to provide best practice care for underserved people all over the world.

Our sessions feature:

- Case presentations.
- Discussion.
- Feedback and mentoring from national experts in the treatment of OUD.
- Didactic content relevant to OUD and office-based MAT.

Our goal is to create a network of physicians, physician assistants, nurses, counselors and social workers collaborating to support each other in treating opioid addiction in their communities.

Session-based module offerings:

- Opioids and pain-identifying and reducing risk for OUD
- What is high-quality medication-assisted treatment (MAT)?

Project ECHO is a program by the Medical University of South Carolina, a public university that provides education on behalf of Healthy Blue.

For registration information, contact Almarie Ford, LCSW, Senior Business Change Manager:
